

RISHITA MANTRI

rishita.mantri@duke.edu • 919-641-3144 • Durham, NC • [linkedin.com/in/rishitamantri/](https://www.linkedin.com/in/rishitamantri/) • github.com/Riri0101

Data Analyst and Duke Fuqua MS graduate with a Computer Engineering foundation and a track record of building NLP pipelines, predictive models, and executive dashboards to solve customer, product, and operational problems, including a Tableau-based portfolio analysis that surfaced \$112.3M in gross profit exposure and informed capital allocation decisions for C-suite leadership. Combines technical depth (SQL, Python, Tableau, Power BI) with hands-on project delivery experience across cross-functional teams, translating complex analysis into decisions executives can act on. Authorized to work in the U.S. on F-1 STEM OPT

TECHNICAL SKILLS

Analytics and Visualization: SQL, Tableau, Power BI, Advanced Excel, Google Analytics, Looker

Data and Programming: Python (Pandas, NumPy, Scikit-learn), Snowflake, Databricks, AWS(S3), Predictive Modeling, Deep Learning

Business and Product: A/B Testing, Trend Analysis, Funnel Analysis, Process Improvement, Requirements Gathering

AI and Automation: Claude Code, Workflow Automation, AI-Assisted Analytics, Generative AI

EDUCATION

Duke University, The Fuqua School of Business

Durham, NC

MS in Quantitative Management: Business Analytics, Marketing Track (STEM)

May 2026

Coursework: Data Science, Decision Analytics and Modeling, Data Visualization, CRM, Pricing Analytics, Market Research

NMIMS University

Mumbai, India

Bachelor of Technology, Computer Engineering

May 2025

Extracurriculars: Joint Secretary of Student Council; Teacher Volunteer (Community Service); Research Assistant

WORK EXPERIENCE

NEW YORK YANKEES

Durham, NC

Data Scientist

Mar 2026 – May 2026

- Uncovered platform-specific sentiment gaps (Instagram, Reddit, Twitter) by building a cross-platform NLP pipeline (RoBERTa, Cardiff NLP) on 30K+ fan conversations, informing where the brand needed distinct content strategies
- Built a fan segmentation framework (six personas) that identified a high-risk content category and game-day windows with 6x higher engagement, directly shaping platform-specific recommendations
- Presented findings and a platform-specific content strategy to senior stakeholders to reduce brand risk and increase fan engagement

CIDRUS TECHNOLOGIES

Bangalore, India

Project Management Intern

Nov 2024 – May 2025

- Kept 5+ cross-functional projects on schedule and within budget by proactively tracking timelines, budgets, and dependencies, and flagging risks early enough for senior stakeholders to intervene before delays occurred
- Cut issue resolution time by 35% for an AI-powered stylist system by analyzing recurring usage and failure patterns, then partnering with design and engineering teams to redesign the interface around the most common friction points
- Increased app-based submissions from 65% to 80% by redesigning the request-intake workflow within a society management app, reducing manual handling and back-and-forth for administrators

ANIRUDDHA TELEMETRY SYSTEMS

Mumbai, India

Business Analyst

May 2024 – Oct 2024

- Reduced operating costs and improved resource allocation by building and maintaining 6+ real-time Tableau and Excel dashboards that gave leadership live visibility into fleet movement, fuel consumption, and utilization across the client base
- Uncovered cost-saving and route-efficiency opportunities across 300+ GPS- and IoT-enabled assets by benchmarking fleet performance, giving clients a clear view of where operations were underperforming
- Strengthened system reliability by reviewing 10k+ daily telemetry events to catch anomalies and errors before escalation

NEELA FILM PRODUCTION

Mumbai, India

Customer Marketing Analyst

May 2023 – Oct 2023

- Identified new product and marketing opportunities by mapping user journeys and defining 10+ KPIs across 20K+ monthly sessions
- Shaped content positioning by synthesizing 500+ audience comments and reviews into recurring storyline/character themes
- Lifted landing-page conversion 12% by tracking micro-conversions across 15+ pages and driving A/B testing with cross-functional teams

SELECTED PROJECTS

Buyer Churn & Retention Analytics (Oct 2025) (Python, Pandas, Scikit-learn): Built classification models on 77K+ users to flag churn risk, finding that 97% of the highest-risk cohort was already unrecoverable and redirecting retention strategy toward earlier, targeted intervention

Global Portfolio Revenue Analysis (Feb 2026) (Tableau, Excel): Built executive-facing Tableau dashboards analyzing \$112.3M in gross profit (55.93% margin) across a 66-store global portfolio, revealing that the top 3 categories drove 67% of revenue and flagging 17 at-risk stores accounting for 20.93% of six-month revenue, to guide capital allocation and expansion decisions for C-suite leadership

AI-Driven Design Integration (Aug 2024) (Python, GANs, CNNs): Presented at the International Conference on AI and ML (ICAML); developed AI techniques for artwork transfer onto fabrics, enabling 15% faster design iterations with processing times under 1 second per image
